A creative Full Stack Developer with an entrepreneurial spirit, proficient at Web Application Development using Git and modern web tools. With attention to detail, I take ideas, deliver quickly and consistently, and build things that provide a ton of value in a short amount of time.

TECHNICAL SKILLS

- JavaScript, React, React Native, Redux, TypeScript, Node.js, Python, Ruby, Rails, SQL, NoSQL, A/B Testing, Responsive Design, Agile Development, and Git workflow-based programming
- **LANGUAGES:** Native English/ Fluent Hebrew

EXPERIENCE

Full Stack Developer — Wematch.live Feb 2022 - Present

- Contributed through continuous integration, building full stack features and tools to suit active users' requests, in an agile environment.
- Overhauled the existing client side codebase - was responsible for refactoring technical-debt and implementing new UI tools into the application lifecycle and workflow.
- Collaborated beside UX designers to build sleek UI components and optimize client-side development, providing a better overall user experience for developers and users.

Jr. Data Engineer — X8 Data Company July 2021 - Feb 2022

- Created Automation tools using Python and various API applications for automating business needs, web scraping, and generating datasets.
- Combining SQL and Data Analysis to deliver quality structured data to build various client-facing solutions.

Frontend Developer — Branded AF March 2021 - Feb 2022

- Produced elegant web applications by translating UI/UX design wireframes into high quality and responsive UI pages and components.
- Focused on client-side web applications, integrating API, server-side, and Web3 based services.

Software Engineering Consultant — Supervillain Software Group Jan 2020 - March 2021

- Designed, developed, and maintained key features and components of the software using Javascript and modern web tools.
- Finalized the product MVP while simultaneously enhancing the client-side performance and overall UX, which led to immediate user growth.
