

Barak Saidoff | Full Stack Developer

Mail: barak.saidoff@gmail.com | [Website](#) | [Linkedin](#) | [GitHub](#) | [Blog](#)

As a creative Full Stack Developer with an entrepreneurial spirit, I take pride in my ability to develop backend API systems and turn them into responsive UI applications. I have become a JavaScript / UI veteran through my proven industry experience building startups in both the NYC / Tel Aviv tech spaces.

TECHNICAL SKILLS

- JavaScript, TypeScript, React / Native, Redux, Node.js, Python, Ruby on Rails, SQL, NoSQL, A/B Testing, Responsive Design, Agile Development, and Git workflow-based programming

EXPERIENCE

Full Stack Developer — Wematch.live Feb 2022 - Present

- Led the modernization of Wematch.live's frontend development, migrating from deprecated class-based components to React 18 functional components for improved codebase efficiency and maintainability.
- Collaborated with the UX designer to execute a comprehensive UI redesign, rebuilding core components from scratch and optimizing the entire UI system using the latest CSS practices.
- Introduced React Storybook to enhance component documentation and promote reusability across multiple repositories, contributing to a more streamlined and organized development workflow.

Jr. Data Engineer — X8 Data Company July 2021 - Feb 2022

- Created Automation tools using Python and various API applications for automating business needs, web scraping, and generating complex datasets.
- Combining SQL and Data Analysis to deliver quality structured data to build various client-facing solutions.

Frontend Developer — Branded AF March 2021 - Feb 2022

- Collaborated with UX designers to transform Figma, Adobe XD, and Zeplin wireframes into responsive React applications, contributing to the development of dozens of repositories across various teams.
- Led the development and successful launch of Watery.com, an innovative online real estate portal specializing in waterfront properties.

Software Engineering Consultant — Supervillain Software Group Jan 2020 - March 2021

- Designed, developed, and maintained key features and components of a SASS service.
- Played a key role in finalizing and launching the MVP by enhancing client side UI components while improving complex server-side CRUD actions

EDUCATION

Flatiron School, New York City, NY 2019 - 2020
